## ESELEN F1 - 1 L

<b>Type</b>	Oral vitamin and mineral supplement
<b>Composition</b>	Vitamin E: 100 000 mg Selenium: 1000 mg
<b>Intended For</b>	Cattle, pigs and poultry
<b>Uses</b>	<p>For the prevention and treatment of vitamins E and selenium deficiencies in cattle, pigs and poultry. Vitamin E is a natural anti-oxidant that promotes the biological availability of vitamin A.</p> <p>The combination of vitamin E and selenium is indicated for periods of growth, production and convalescence by promoting muscular, vascular and nervous functions. It may be indicated in prophylactic cases shown by poor breeding performance, nutritional muscular dystrophy (in young animals turning out to grass), or during period of heavy work load. The therapeutic indications are various manifestations of nutritional muscular dystrophy (white muscle disease, nutritional myopathy) affecting cardiac and/or skeletal muscles and associated symptoms.</p> <p>Nutritional target: Eselen is recommended for critical phases of growth and ensures the animals a good food transition. For the preparation in breeding. Eselen provides the quantity of trace elements needed for an optimum body and health state in animals.</p>
<b>Dosage &amp; Administration</b>	<p>Oral route in drinking water.</p> <p>Cattle: 40 ml per cow per day during 2 weeks</p> <p>Calf: 10 to 20 ml per day by periods of 2 weeks in food transition periods</p> <p>Pig: 10 ml per pig per day, 3 days before giving birth.</p> <p>Poultry: 1 litre for 1000 litres of drinking water during 3 to 5 days.</p>
<b>Warnings</b>	Do not overdose the Eselen due to the toxic effect of the Selenium at high doses.
<b>Withdrawal Period</b>	Meat and offal: 25 days
