PHENYLNET INJECTABLE 30 ml

Type	Non-steroidal, anti-inflammatory, analgesic, anti-pyretic activity.
Composition	Active ingredients: Diclofenac sodium 5g Excipient: q.s 100ml
Intended For	Cattle, sheep, goats and pigs
Uses	Diclofenac sodium is a non-steroidal anti-inflammatory drug derived from phenylacetate. It works by blocking the enzyme cyclo-oxygenase, that changes arachidonic acid into prostaglandins which are inflammation mediators. After injecting diclofenac sodium, plasma protein binding is 99.5%, 50% of diclofenac is metabolised in liver, 40% - 65% excreted from kidney and 35% eliminated by bile and excrement. For the treatment of arthritis and muscle aches. Reduces fever caused by types of bacteria, virus and some other factors.
Dosage & Administration	Intramuscular injection Once a day, for 2 to 3 days in succession Cattle: 2.5 mg/kg weight, ie 5 ml for 100 kg Sheep and goats: 2.5 mg/kg weight, ie 1.5 ml for 30 kg Pigs: 5mg/kg weight, ie 5 ml for 50 kg
Warnings	Not for pregnant animals
Storage	To be stored away from heat and light, below 25°C
Withdrawal period	Meat and offal: 28 days Milk: 7 days
