VAMISOLE 300 mg BOLUS

Type	Anthelmintic
Composition	Levamisole hydrochloride 300 mg
Intended For	Cattle, sheep, pigs and goats
Uses	<p>For the treatment and control of parasitic bronchitis, parasitic gastroenteritis in cattle, sheep pigs and goats. Infections with Ascarid worms.</p> <p>When used at recommended dose rate, Vamisole 300 is effective against the mature and developing immature stages of vamisole sensitive Haemonchus, Trichostrongylus, cooperia, Nematodirus, Bunostomum and Oesophagostomum species in the gastro-intestinal tract, and Dictyocaulus spp in the lungs. Vamisole belongs to imidazothiazoles. It is very safe to use, and its availability in the blood is very quick. Vamisole does not induce photosensitivity and studies have proven a non specific immunostimulant effect</p>
Dosage & Administration	<p>Oral bolus</p> <p>½ bolus per 20kg</p> <p>1 bolus per 40kg</p> <p>2 boli per 80kg</p>
Warnings	<p>No side effects known at recommended dosage</p> <p>Should not be used simultaneously or within two weeks after treatment with products containing organophosphorus or diethylcarbamazine citrate</p>
Withdrawal Period	<p>Meat and offal: 18 days</p> <p>Not to be used in lactating animals</p>
